

## Monthly Safety Meeting

Airline and military pilots have one thing in common -- they both fly stabilized approaches. It's the surest way to avoid landing mishaps. You've probably heard of them, but do you actually fly them or even know what they are. Uwe Zeizinger (FAASafety Team Representative, German Air Force Pilot (ret), ATP/CFII/MEII, and Director of Operations at Aerospace N3xt) will tell us all we need to know to insure that we too fly safe and well controlled stabilized approaches. Wings credit will be awarded to attendees.

**Directions:** Drive to 2907 Garnett Ave, Wichita Falls, TX
